Re: NPDES Permit No. ID-000003-5

Dear Sir:

The above referenced NPDES permit for the discharge of pollutants from your facility requires that the effluent be monitored periodically and the results of the monitoring reported to EPA. Our compliance evaluation records indicate that Discharge Monitoring Reports (EPA Form 3320-1) for your facility are overdue.

We request that you submit the required reports to this office within 15 days of receipt of this letter. If you have not been monitoring your discharge, or a discharge has not been occurring, please advise us accordingly. In the event you have not been monitoring the discharge, please provide a schedule for commencing monitoring in accordance with permit requirements.

Enclosed for your use and information are copies of the Discharge Monitoring Report (EPA Form 3320-1) and instructions and guidelines on preparing the report.

If we may be of any assistance in explaining the permit requirements to you, or in working out any difficulties you may be having in complying with the requirements of your permit, please contact us. Correspondence should be addressed to the mail stop indicated above, or you may call Amos Bates at (206) 442-1213 or Rick Walters in the Idaho Operations Office at (208) 384-1450.

Sincerely,

A handwritten signature in dark ink, appearing to read "W. James Sweeney".

W. James Sweeney
